PROBIOTICS SPECIALIZED INTIMATE HYGIENE WASH

LOW VALUE pH 3.5

S.O.S.

MENSTRUATION AND ANTIBIOTIC THERAPY

PROBIOTICS & PREBIOTICS

LACTIC ACID
UNDECYLENATE

RECOMMENDED IN CASE OF:
INFECTIONS AND IRRITATIONS

DURING CONTRACEPTIVE OR ANTIBIOTIC THERAPY

DURING AND AFTER MENSTRUATION

AFTER INTIMATE CLOSE-UPS

HOW DOES IT WORK?

A combination of **PROBIOTICS** and **PREBIOTICS**, **lactic acid**, and **undecylenate** helps to restore the physiological pH of the intimate area and reduce the risk of infection.

The preparation effectively relieves discomfort, itching, and burning caused by inflammation; has a positive influence on the mucous membranes; strengthens the natural protective barrier; helps to rebuild the beneficial microflora of the intimate area; moisturizes and relieves the feeling of dryness. The gel gently cleanses and refreshes the intimate area, at the same time removing any unpleasant smell. Contains **D-panthenol** which promotes regeneration and soothes micro injuries.

Recommended for daily care of the intimate area, especially throughout periods of lowered immunity.

DIRECTIONS FOR USE: Use for daily hygiene, instead of soap. Cleanse the intimate area with a small amount of the preparation and rinse with water.

300 ml

PROBIOTICS SPECIALIZED INTIMATE HYGIENE WASH

LOW VALUE pH 3.5

BALANCE

MENOPAUSE, HORMONAL
OR CONTRACEPTIVE THERAPY

PROBIOTICS & PREBIOTICS

LACTIC ACID
BETAINE

RECOMMENDED IN CASE OF:

PROBLEMS WITH DRYNESS AND DISCHARGE

IRRITATIONS AND DRYNESS
OF THE VAGINA AND INTIMATE AREA

DURING HORMONAL
OR CONTRACEPTIVE THERAPY

DURING MENOPAUSE

HOW DOES IT WORK?

A combination of **PROBIOTICS** and **PREBIOTICS**, **lactic acid**, and **undecylenate** helps to restore the physiological pH of the intimate area and reduce the risk of infection. The preparation effectively relieves discomfort, itching, and burning caused by inflammation; has a positive influence on the mucous membranes; strengthens the natural protective barrier; helps to rebuild the beneficial microflora of the intimate area.

Natural betaine ensures an optimum level of hydration, keeps the mucous membranes from drying out and relieves the feeling of dryness.

The gel gently cleanses and refreshes the intimate area, at the same time removing any unpleasant smell. Contains **D-panthenol** which promotes regeneration and soothes micro injuries.

Recommended for daily care of the intimate area, especially in case of irritations and skin prone to dryness.

DIRECTIONS FOR USE: Use for daily hygiene, instead of soap. Cleanse the intimate area with a small amount of the preparation and rinse with water.

THE SWIMMING POOL, SAUNA, JACUZZI

WHILE TRAVELLING AND IN POOR
HYGIENIC CONDITIONS

AFTER THE EPILATION OF BIKINI AREA

PROBLEMS WITH INTIMATE AREA,
DRYNESS AND IRRITATIONS

HOW DOES IT WORK?

A combination of **PROBIOTICS** and **PREBIOTICS**, **lactic acid**, and **undecylenate** helps to restore the physiological pH of the intimate area and reduce the risk of infection.

The preparation effectively relieves discomfort, itching, and burning caused by inflammation; has a positive influence on the mucous membranes; strengthens the natural protective barrier; helps to rebuild the beneficial microflora of the intimate area.

Cranberry extract, rich in **vitamins C** and **E**, has refreshing and protective properties. The gel gently cleanses the intimate area, at the same time removing any unpleasant smell. Contains **D-panthenol** which promotes regeneration and soothes micro injuries.

Recommended for daily care of the intimate area.

DIRECTIONS FOR USE: Use for daily hygiene, instead of soap. Cleanse the intimate area with a small amount of the preparation and rinse with water.
