AQUA ENERGY™

innovative complex which combines energising phyto-taurine with magnetic water enclosed in special carriers – the polarisomes. Has strong moisturising properties, acting like a magnet which attracts water molecules in the skin. Stimulates the production of ATP energy – the fuel which enables the correct functioning of cells and restores a fresh appearance to tired skin. Creates a protective layer on the skin, counteracting dehydration caused by pollution and oxidative stress.

Perfecta HYDRO MAGNETIC is a cosmetic line based on the unique Aqua Lock Technology which permits to anchor water inside the epidermis. A synergic action of four most effective hydrating mechanisms produces a deep moisturising effect that is apparent immediately after application and grows with the passage of time.

AQUA LOCK TECHNOLOGY – synergic action of four moisturising mechanisms:

- Reduces transepidermal water loss;
- Binds and locks water molecules inside the epidermis;
- Protects against the negative influence of external factors which cause water loss;
- Sustains the water-electrolyte balance in the cells.
