FENOMEN CTH

Perfecta PHENOMENON CTH

is a line of cosmetics developed basing on the unique CTH complex
- a composition of three concentrated forms of vitamin C:

- LIPOPHILIC
- LIPOSOMAL
- HYDROPHILIC C⁵³⁰⁰

combined with SVCT-1 transporters which promote
the transport of vitamin C directly into skin cells.

This technology of hypermigration (TH) of vitamin C
is a newest development in cosmetology and a crucial factor
which determines its optimal assimilation and effective performance.

PERFECTA PHENOMENON CTH
PHENOMENAL ILLUMINATING AND REJUVENATING EFFECT

Perfecta PHENOMENON CTH line

of cosmetics comprises 8 formulations for face, neck, and décolletage care, characterised by exceptional, state-of-the-art consistencies which guarantee unrivalled sensory experience: the ultra lightweight “**serum to water**”, light and refreshing “**cream to water**”, and rich, velvety “**cream to oil**”.

Each product boasts the unique **CTH COMPLEX** as well as a wealth of active ingredients renowned for their beneficial influence on the skin, including hyaluronic acid, retinol, phytohormones, and biomimetic ceramides.

ACTIVE INGREDIENTS:

CTH COMPLEX is an unprecedented composition of three concentrated forms of vitamin C: lipophilic, liposomal, and hydrophilic C⁵³⁰⁰, combined with SVCT-1 transporters which promote the transport of vitamin C directly into skin cells. The complex provides a deep anti-ageing effect, improves skin firmness and elasticity, and shallows wrinkles. It boosts the synthesis of collagen and hyaluronic acid in the skin and prevents damage caused by UV radiation. **Vitamin C⁵³⁰⁰** extracted from the richest natural source of vitamin C: the Australian Kakadu plum, a fruit that has 100 times more vitamin C than an orange.

High molecular weight **HYALURONIC ACID** shows extraordinary water-binding properties, ensuring the optimum level of moisturising to the skin.

Stable form of **RETINOL**, suspended in a molecular film, counteracts ageing and improves skin elasticity.

PHYTOHORMONES increase the amount of collagen in the skin and improve its microstructure for a visibly smoother complexion.

BIOMIMETIC CERAMIDES are a component of the intercellular cementing substance. They regulate the amount of moisture and sebum in the skin and support its role of a natural, protective barrier.

**Energy & detox
DEEP MOISTURISING
DAY & NIGHT FACE CREAM
SPF 6**

30+

Unique, exceptionally light, "cream to water" formula.
